

together until they audibly engage (click!). For this, take hold of the screw-type quick connector (3) at the knurled part with one hand and, with the other hand, the quick plug-in connector with "Aqua-Stop" system. Grasp them at an appropriate location, so as to avoid crushing or abrasion injuries to the fingers or hands during insertion. Then open the tap.

- D. To release the sprinkler hose (1) from the quick plug-in connector with "Aqua-Stop" system, which is attached to one end of the garden hose, grasp the screw-type quick connector (3), attached to the sprinkler hose (1), at the knurled part, as shown in the figure and, with the other hand, grasp the quick plug-in connector with "Aqua-stop" system at a suitable location. Then, disconnect the sprinkler hose (1) by pulling in the direction of the arrows shown in the figure.
- E. If necessary, the sprinkler hose (1) can be shortened, by cutting it to the required length with a suitable tool, such as a pair of scissors. After you have cut the sprinkler hose (1), follow these instructions:
- Ea. Disassemble the screw-type end piece (2) by unscrewing part (b), and then part (c), followed by part (a) from the sprinkler hose.
- Eb. Attach the screw-type end piece onto the new end of the sprinkler hose (1) by inserting this end of the sprinkler hose (1) into part (a) of the screw-type end piece (2). Now plug part (c) onto the end of the previously in part (a) inserted hose and secure it with end piece (B) by firmly tightening it down.

You have 3 years warranty on this product.
